

Integral Colors for Concrete and Concrete Masonry, Sealers and Automation Equipment.

All Powder Pigments Granufin® Hydrotint® Mix-Ready® True Tone™ W-1000 Sealer Color Seal II™ Granumat® **Chameleon®** Concrete Palette™ Software

Chameleon® Liquid Color Dispensing Equipment

The Chameleon® system raises colored concrete to a higher level. Introducing the world's first PC-operated automatic color metering system specifically engineered to satisfy the unique requirements of Ready-Mix operators. Developed by Davis Colors, the Chameleon® system breaks new ground by combining innovative new liquid color metering technology with the computing power of standard PC and the versatility of Windows® - based operating software.

Chameleon® Ready Mix **Chameleon® Precast** **Chameleon® Express**

Optimized to work in combination with our [Hydrotint®](#) liquid pigments, the Chameleon® is the most efficient, accurate and easy-to-use system available for weighing, blending and conveying colors into a Ready-Mix® truck. And, because the Chameleon® system is fully modular, it is easy to install, easy to customize and can grow to match your changing requirements. What's more? Since we designed the machine and make the color, you get a system with the support and service you expect from the people who have more automatic color systems in operation worldwide and in the U.S. than any other manufacturer.

Chameleon® Concrete Color Automation

Touch screens and complicated instructions are history. Graphic operator-interface, mouse and keypad control are easy-to-understand and easy-to-use.
